Placement Process

The Placement & Career Counseling cell has developed and implemented an Android App SCOPE(St. Ann's COLlege Placement Engine)for the students for the placement process in the year 2019.(From Registrations till Feedback).

The main purpose of the app is to develop a system that can be used by the placement cell of a college and also to design a system that provides functionalities to perform the activities related to placement services. It also allows the committee members and students to view the company's facilities and also helps placement coordinator to select under different platforms.

Through the placement app, the students can register with the placement cell and their account will be approved by the placement coordinator after checking the payment details. Then the students will get their own login credentials, through them they can view the company details/ Placement drive details etc. At the end of the academic year, students can give the feedback on the company and the placement committee through this app only. It's the digital platform to communicate with the students 24/7.
